# What is Anti-Mosquito?

**WEAVERS DEVELOPED AN ANTI-MOSQUITO TECHNOLOGY THAT KEEPS MOSQUITOS AWAY FROM YOUR FURNITURE USING OUTDOOR FABRICS.**

Mosquitoes are attracted to humid and cool environments.

Watering the plants and trees in the gardens creates living spaces for mosquitoes.

On summer days, our sweaty skin attracts mosquitoes who prefer humid surfaces.

Compounds such as carbon dioxide and lactic acid attract them.

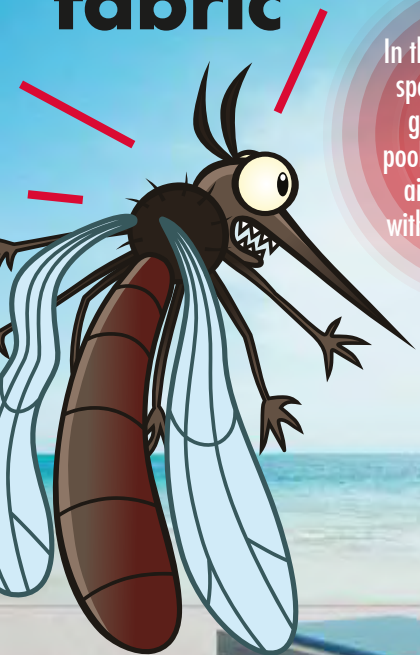

# UNINTERRUPTED OUTDOOR PLEASURE

# Anti-Mosquito on outdoor upholstery fabric

In the summer, we like spending time in the garden and at the poolside enjoying fresh air and sunbathing without any problems.

The annoying sounds and bites of the mosquitoes can ruin these beautiful moments!

We try desperately to get rid of all of this.

Anti-mosquito and multi-functional technology used by Weavers for outdoor fabrics was developed for your comfort.

In addition, membrane fabrics and outdoor fabrics can be customized according to your requirements.

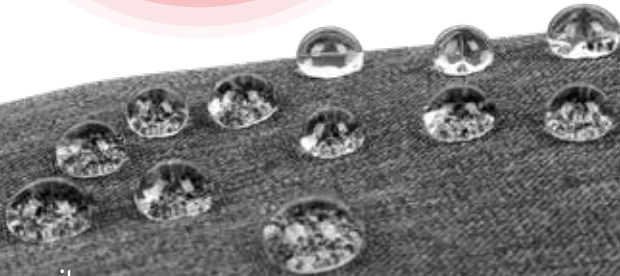

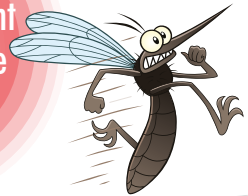

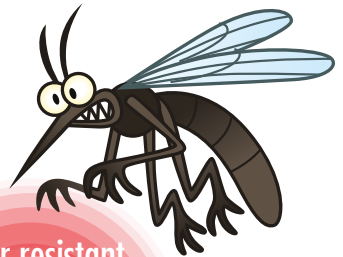

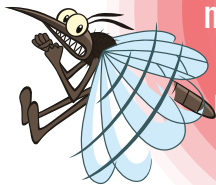

These fabrics also offer water resistance as well as anti-mosquito effects.

# Multi-functional Outdoor Fabrics

Due to their special structure, Weavers anti-mosquito effective multi-functional outdoor fabric products keep mosquitoes away from your environment.

Water resistant features prevent moisture in the fabric.

# Advantages of Anti-Mosquito

- Provides a significant reduction in mosquito landings.
- 90% effective in preventing mosquito bites.
- Prevents unwanted odors due to an antibacterial effect.
- Provides long-term bacterial protection and hygiene.
- Prevents the contamination of dust mite microbial food sources (such as yeasts, molds and bacteria), destroys them and provides long-term protection.
- Does not contain heavy metal or harmful chemicals.
- Does not irritate skin, is suitable for sensitive skin.
