

# GREAT IDEAS, LESS CARBON FOOTPRINT!

The world has enough for everyone's need,  
but not enough for everyone's greed.

Mahatma Gandhi

## OUR NATURE, OUR FUTURE

A million plastic bottles are bought around the world every minute and only 14 % of these plastic bottles are recycled. While it takes a thousand years for Pet bottles to decompose in nature, 8 million tons of plastic bottles are thrown away each year. It is up to us to make a change and reverse the devastating consequences for our ecosystem...

Plastic bottles, which take 1000 years to decompose in nature, are collected through the recycling process and converted into yarn, fabrics, sofas and decorative pillows. As well as bringing elegance to homes, when you buy a sofa made of recycled fabric, you save around 500 pet bottles from being thrown away into nature.

Saves up to  
65% on  
energy.

Reduces  
plastic waste.

Gives plastic  
a second life.

Saves up to  
94 % on water.

Reduces the amount of  
carbon emissions by 32%.

Nonflammability and  
easy clean treatments  
may be applied onto  
recycled fabrics.

Conserves nature and  
natural resources.

## A GREEN WORLD, A CLEAN WORLD
