By The Lack Of
Magnetic
Field

Don't

Be Affected

The presence of the magnetic field that surrounds us in space, just like gravity, is a proven scientific fact.

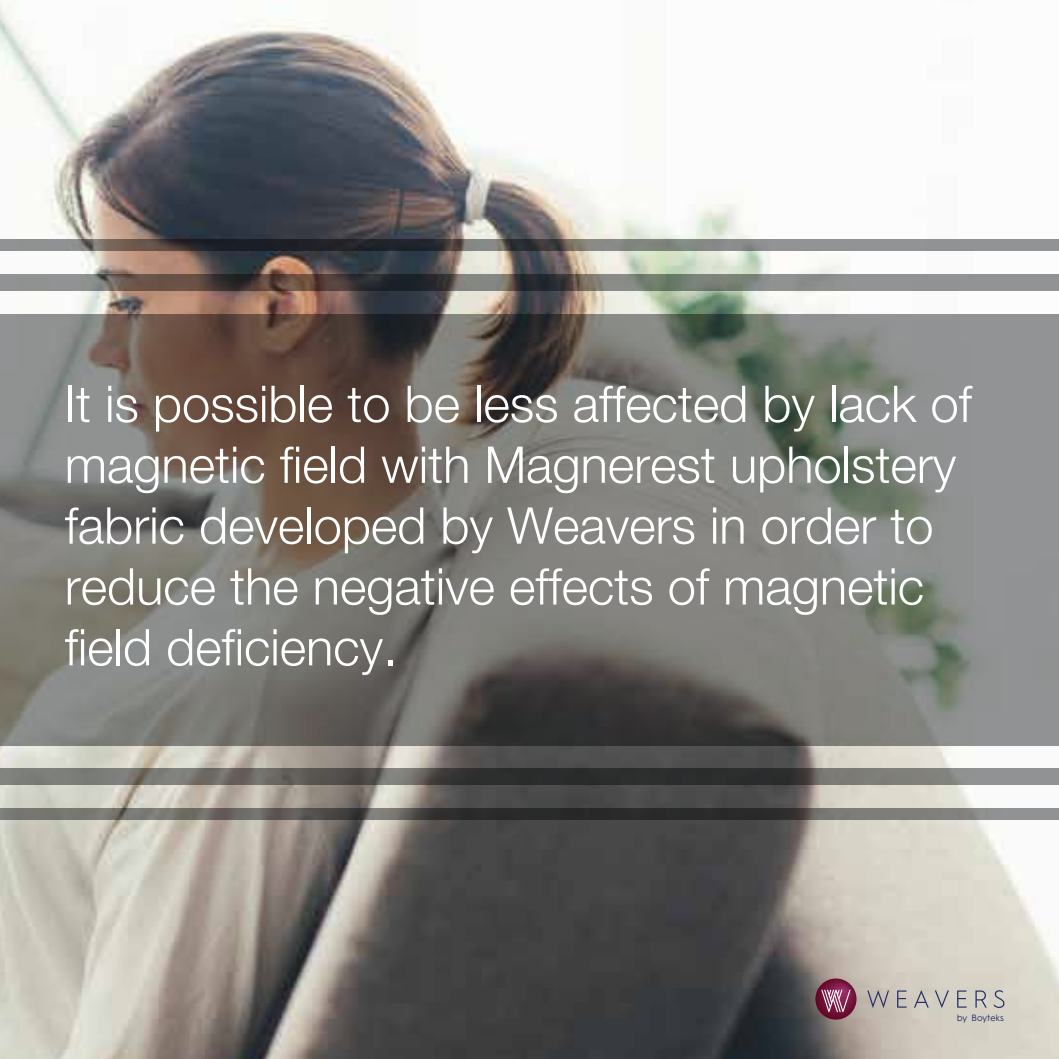

Field

WEAVERS
by Boyteks

All living or non-living beings have their own magnetic fields and everything is under the influence of this magnetic field called the "Magnetosphere". However, the effect of this magnetic field is diminishing.

A woman with dark hair in a ponytail is sitting on a light-colored sofa, looking out a window. The background is bright and slightly blurred, showing some greenery. The text is overlaid on a semi-transparent grey background.

It is possible to be less affected by lack of magnetic field with Magnerest upholstery fabric developed by Weavers in order to reduce the negative effects of magnetic field deficiency.

**Magnetic
Therapy**

The magnetic field in the human body comes from the movement of bioelectric charges.

WEAVERS
by Boyteks

Human beings, aside from their own magnetic fields, are naturally under the influence of the magnetic field, and the magnetic field of the human body moves in harmony.

This harmony can
break down due to
various reasons.

Many scientific studies have been conducted for what is referred to as the "Magnetic Field Deficiency".

One of the most renowned researches in this field is the study conducted by the Japanese physician Prof. Dr. Nakagawa's* work conducted on more than 10,000 patients. Nakagawa's studies have concluded that many problems that arise are caused mainly by the weakening state of the magnetic field surrounding the human organism.

**Nakagawa, Kyoichi, M.D., "Magnetic Field Deficiency Syndrome and Magnetic Treatment", Japanese Medical Journal No. 2745, Dec. 4, 1975*

Linus C. Pauling **, an American who has twice won the Nobel Prize, has proven that the iron-containing hemoglobin in our blood has magnetic properties. As such, the blood circulation rate increases as a result of the magnetic field effects. Thus, more oxygen and nutrient transport is provided to cell structures.

***Pauling L, Coryell CD. The Magnetic Properties and Structure of the Hemochromogens and Related Substances. Proc Natl Acad Sci U S A. 1936 Mar;22(3):159-163*

The most important thing for body health is good blood circulation.

Nutrients, oxygen, vitamins and enzymes need to be transported quickly and sufficiently to stay more healthy.

The effect of magnetism activates metabolism and supports body circulation positively.

Magnerest upholstery fabric developed by Boyteks to support more regular and faster body circulation, helps to rise the energy level throughout the day with the magnetic field it creates.

How Does Magnereest Work?

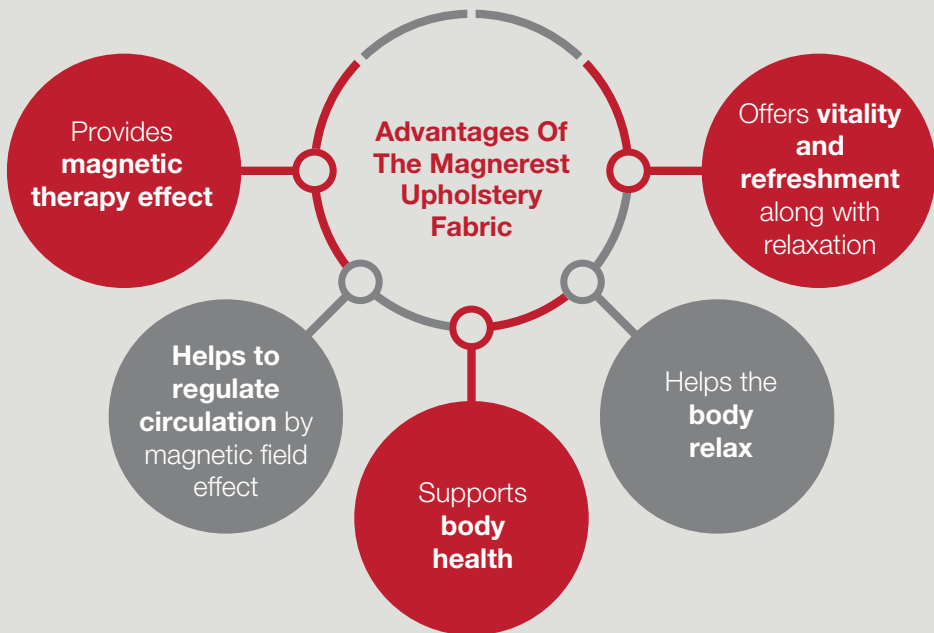

Regular body circulation is an indispensable factor for a healthy life. The Magnerest upholstery fabric creates a magnetic field on the fabric surface thanks to the special formulation contained in its structure.

The magnetic field created by the Magnerest passes through the tissues in waves and allows the body's circulation to be faster and more organized.

The Magnerest supports blood circulation, so that the body cells are fed with more oxygen. So the body energy is balanced. Improvement of blood circulation increases overall body health.
